Supported Windows Server OS versions: Standard, Enterprise and Datacenter

Supported Windows Desktop OS versions: Professional, Business, Enterprise and Ultimate¹

¹ Microsoft Windows Server and appropriate client access licenses are required for multiuser environments using NComputing products. Desktop operating systems such as Microsoft Windows XP, Microsoft Windows Vista, Microsoft Windows 7, Microsoft Windows 8 and Microsoft Windows 10 are appropriate for single user applications such as 1:1 VDI, display systems, and remote access. Home versions are NOT supported. Additional information on licensing is available at <http://www.ncomputing.com/mslicensing> including frequently asked questions.

² vSpace Client is supported on PCs, laptops and netbooks running Windows XP SP3 (32-bit), Windows 7 SP1 (32- and 64-bit), and Windows 8 as well as Windows Server 2008 R2 SP1, and Windows Multipoint Server 2011.

³ Only supports Server 2008 R2 (non-SP1) and MultiPoint Server 2010 (non-SP1). For MultiPoint Server 2011, driver option is available - see Download Center.

✓ – Client device is supported. X-series and U-series are zero-clients and do not have firmware thus no firmware version is specified.

END OF SUPPORT PRODUCT:
vSpace Server for Windows versions and access device firmware
Legacy downloads are provided as-is with no warranty or support coverage.

Offline registration for legacy (unsupported) vSpace Windows products will require a \$149 processing fee per server registration.
IMPORTANT NOTE: All offline registration for legacy (unsupported) vSpace Windows product will no longer be available as of **July 1, 2020**.
